Specific cleaners and disinfectants that are listed have passed LDI's testing protocol for chemical resistance. It also means that customers using these products have not reported systemic issues to LDI related to unacceptable material degradation.

Combining multiple cleaners and disinfectants without rinsing between applications may accelerate material degradation in a manner that cannot be quantified or screened for. We suggest you follow the instructions of your chemical supplier. Combine chemicals at your own risk.

LDI's recommendations for proper care and maintenance are found in each products Care and Maintenance instructions.
