

2025 Cleaning and Disinfection Guidance

LDI Interiors offers durable, Polyurethane-coated fabrics for high-traffic environments, including hospitality, healthcare, and educational spaces. These high-traffic applications require flexibility and durability, along with various cleaners and disinfectants that cater to the specific needs and requirements of their respective applications, thereby ensuring the health and safety of end users. To eliminate the guesswork in selecting cleaners and disinfectants, we provide the list below of products that have been successfully tested with our materials when used in accordance with published cleaning practices.
