

Wyoming Care and Maintenance Instructions

January 2024

A regular cleaning schedule is suggested to extend the useful life of your upholstery and maintain its' appearance. To maximize the lifespan of your material:

- Keep the surface free from dirt and debris. Vacuuming or light brushing is preferred.
- Spills and stains should be cleaned as soon as possible. Use a soft lint-free cloth or towel and avoid steel wool and cleaners containing abrasives.
- Avoid over-saturation with liquids and remove cleaning or disinfectant solutions with a cloth and clean water, then dry the surface thoroughly.
- See the Approved Cleaners and Disinfectants List for the specific upholstery material to ensure there are no known compatibility issues.

Ordinary Dirt and Water-Soluble Stains: Clean with mild soap and water.

Stubborn Stains: Remove with rubbing alcohol.

Disinfect: Disinfect with 20 to 1 water to bleach solution that contains 6% hypochlorite.

Cleaning Code: S/W

Disclaimer:

This guide offers suggestions for the care and maintenance of upholstery from LDI interiors. However, not all stains can be removed, especially if the stains are not addressed immediately. This information does not relieve the user from the responsibility for the correct and safe use of the product and cleaning methods. LDI Interiors is not responsible for any damage incurred with improper cleaning beyond what is outlined in LDI's Upholstery Warranty.
