\* Indicates the best choice

Specific cleaners and disinfectants listed above have passed LDI’s testing protocols for chemical resistance. In addition, customers using these products have not reported systemic issues to LDI related to unacceptable material degradation.

Combining multiple cleaners and disinfectants without rinsing between applications may accelerate material degradation in a manner that cannot be quantified or screened. We suggest you follow the instructions provided by your chemical supplier. Combine chemicals at your own risk.

LDI’s recommendations for proper care and maintenance are found in each product’s Care and Maintenance instructions.
