

EnviroLeather™ helps hospitals meet the criteria outlined in the Healthier Hospitals Healthy Interiors goals of the Safer Chemicals Challenge. We have eliminated the intentional use of polyvinyl chloride (PVC, also known as vinyl), flame retardants, formaldehyde, perfluorinated compounds and antimicrobials.

The exclusive, high tech construction at the heart of every EnviroLeather™ Collection is designed to be a healthier alternative to PVC (vinyl) and to outperform traditional PVC-Free upholstery (typically polyurethane) and woven textiles.

- PVC-Free and low VOC
- Resistant to healthcare cleaners and disinfectants
- Superior durability and abrasion resistance
- Excellent recovery to reduce sagging or wrinkling

Material described herein meets the Healthy Interiors goal of the Safer Chemicals Challenge according to the manufacturer. Practice Greenhealth does not verify this information.

The following Collections meet the criteria outlined in the Healthier Hospitals Healthy Interiors goals of the Safer Chemicals Challenge.
