

# LDIinteriors™

Sustainable Technology · Limitless Color · Ultimate Performance

**SUSTAINABLE &  
DURABLE UPHOLSTERY**

## INFECTION CONTROL

The CDC recommends a sanitization regimen of cleaning then disinfecting surfaces to reduce the spread of infection. They do not advocate the use of antimicrobial additives.

There is no evidence to suggest antimicrobials offer any enhanced protection from getting sick. In fact, their presence may do harm by leading to the formation of resistant strains of bacteria, making it more difficult to treat the sick. LDI upholstery attracts fewer microbes than woven textiles, can be sanitized, and comes with no antimicrobial additives.

## BRAIN DEVELOPMENT

Flame retardants are added to products to reduce the spread of fire. According to the National Institutes of Health, some flame retardants have been linked to cancer and to adversely impacting fetal and child brain development. LDI upholstery meets standard flame codes for commercial interiors and is offered with no flame retardants.

## CANCER

Perfluorochemicals (PFC's) are used as stain resistant finishes on many fabrics. According to the EPA, PFC's have been linked to cancer and hormone disruption. They also bioaccumulate and have been found in the blood of polar bears, dolphins, and humans. LDI upholstery has excellent stain resistance but contains no PFC's.

## HORMONE DISRUPTION

Plasticizers are added to vinyl (PVC) upholstery to add flexibility. According to the National Cancer Institute, phthalate plasticizers have been linked to adverse reproductive effects in males and are suspected endocrine disruptors. LDI upholstery is soft and flexible without the use of phthalate plasticizers.

## LDI INTERIORS

Develops durable upholstery that improves indoor air quality and contributes to healthier commercial interiors.

## OUR STORY

Our innovative technology in proprietary performance coatings and formulations is leading the movement in commercial interiors to sustainable, high performance and less toxic fabrics.

Backed by industry leading warranties, you can feel good that you are doing something good for the planet & human health, while remaining confident that your investment in upholstery will hold up to rigorous use and last a long time.

## CLEANABILITY

A 2020 LDI study shows that woven textiles and faux leathers with pronounced grains harbor over 200% more bacteria and germs on average than the smoother surfaces of LDI upholstery.

## DIGITAL PRINTING

You can achieve the look of a woven textile while retaining the cleanability of a wipeable, durable coated fabric.

# WHY DO THESE RESPECTED ORGANIZATIONS SPECIFY LDI INTERIORS?

## PERFORMANCE

Healthcare, Senior Living and Higher Education are our primary markets. If we offer a product you can be assured that it is designed to be used in the most demanding of interior environments.

## QUALITY CONTROL

We are obsessed with quality consistency. Each production run is put through rigorous testing to ensure superior performance in heavy duty commercial applications.

## DESIGN FLEXIBILITY

Our industry-first, digital printed upholstery technology gives you unparalleled design freedom. Easily modify pattern colorways with no upfront cost, quick turnaround and only a 5 yard minimum order.

## REDUCE EXPOSURE TO CHEMICAL TOXINS

Regardless of your budget, we have taken care to eliminate common chemicals of concern.
